why is it that we are so drawn to and enticed by sacred geometry they start with simple mathematical shapes that combine to create elaborate illustrations of such beauty and elegance that we marvel at them beliefs religious spiritual and cultural have been historically attached to them the specific design and creation of each individual sacred geometric pattern is thought among many cultures not only to demonstrate an understanding of specific universal concepts but to hold powers of mystical possibilities the aim of this book is to provide an understanding of the history creation and meanings of sacred geometry for those who are new to the subject and to open an insight into the beliefs placed upon them with the hope that it will inspire the reader s interest and imagination and increase their enthusiasm enjoy learning how such simple shapes can evolve into inspiring and powerful patterns that weave through the fabric of our entire universe and reality

this book covers recent achievements on the ever expanding field of geometry and graphics on both analogical and digital fronts from theoretical investigations to a broad range of applications new teaching methodologies and historical aspects it is from 20th international conference on geometry and graphics icgg2022 a series of conference that started in 1978 and promoted by international society for geometry and graphics which aims to foster international collaboration and stimulate the scientific research and teaching innovations in the multidisciplinary field the contents of the book are organized in theoretical geometry and graphics applied geometry and graphics engineering computer graphics graphics education geometry and graphics in history and are intent for the academics researchers and professionals in architecture engineering industrial design mathematics and arts

this book brings together geometric tools and their applications for information analysis it collects current and many uses of in the interdisciplinary fields of information geometry manifolds in advanced signal image video processing complex data modeling and analysis information ranking and retrieval coding cognitive systems optimal control statistics on manifolds machine learning speech sound recognition and natural language treatment which are also substantially relevant for the industry

geometry and topological concepts is an exploration of the fundamental principles and applications of geometry and topology in mathematics and related fields this book delves into the intricacies of shapes sizes and the properties of space emphasizing the connections between these areas of study it covers essential topics such as euclidean and non euclidean geometries topological spaces and geometric transformations providing readers with both theoretical foundations and practical examples ideal for students and professionals it fosters a deeper understanding of the mathematical structures that underpin our world

this volume is the first attempt to investigate explicitly how the multiplicity of religions and forms of spirituality interconnect with the pluralism of languages including scientific codes formal languages and artistic expressions in a journey beyond babel the volume explores how religious and linguistic pluralisms enter into polyphonic relations how they co evolve and grow together and why they clash this text provides the setting for a dialogue on a rich variety of religious languages and traditions including hinduism judaism islam jainism and christianity the chapters explore how these traditions can venture into new interreligious paths how sacred meanings translate into vernacular speeches how religious identities and scientific notions interacts what role emotional expressions play in interfaith encounters and the impact of artificial intelligence on beliefs the book is authored by esteemed senior scholars established researchers and exceptional junior doctorate holders whose expertise spans across religious studies the history of science philosophy fine arts theology linguistics computer science and legal studies this volume contributes to interfaith studies and teaching to sociology and philosophy of religion and to the history and anthropology of religion and the sacred arts it is intended to reach students researchers instructors and professionals alike
